

In Norway, strong battery research communities have flourished for over a decade, attracting growing interest from the industry. The value chain perspective is important when discussing batteries in Norway.

Morrow will deliver tailored battery solutions for the maritime industry's transition to cleaner energy sources. Our batteries will allow marine vessels to travel further, faster, and safer, cutting 800,000 tons of carbon dioxide in ...

3 ???&#0183; Nordic Batteries" automated production process enables cost efficient battery production in Norway. At its facility in Kongsberg, the company has developed a world-leading robotic pilot line that boosts efficiency with 4.0 industry technology and is powered by renewable energy, reducing emissions.

Whether for EVs or energy storage, Norway has always had ideal conditions for battery growth: renewable energy in the form of hydropower, strong government financial incentives for EV purchases, and a well-established process industry to provide battery materials.

Morrow will deliver tailored battery solutions for the maritime industry's transition to cleaner energy sources. Our batteries will allow marine vessels to travel further, faster, and safer, cutting 800,000 tons of carbon dioxide in Scandinavian countries alone.

Elinor Batteries will produce and deliver sustainable batteries to a skyrocketing global market, based on Norway's competitive renewable energy and the use of sustainable raw materials. We are currently developing our plans for a giga-scale battery factory in Orkland, Norway.

We develop battery modules, racks and energy storage systems designed to power industrial applications across challenging sectors, including construction, maritime, defence, and grid systems. At Nordic Batteries we focus on what is important: safety, reliability and performance.

Elinor Batteries will produce and deliver sustainable batteries to a skyrocketing global market, based on Norway's competitive renewable energy and the use of sustainable raw materials. We are currently developing our plans for a giga ...

Elinor Batteries plans for a giga-scale battery factory near Trondheim, Norway. Based on 100% renewable energy and nordic mineral resources, the factory will supply sustainably produced batteries to the European Energy Storage market.
