What is a lithium ion battery?

Lithium-ion batteries have a high energy density and are among the most powerful batteries. Compared to NiMH batteries,they have a low self-discharge rate and are not subject to memory effect. They do not require regular discharging so are low-maintenance.

What is a lithium-ion replacement battery?

These batteries can also be used in radio-controlled models and telecommunication applications. Please note: With lithium-ion replacement batteries of a significantly higher capacity than the original battery (1000mAh and higher), the replacement may differ slightly in size and thus be marginally heavier or thicker.
