

How can Mauritius reduce reliance on fossil fuels?

Our strategy is to sustainably and efficiently transform available energy sources to reduce our country's reliance on fossil fuels. We are the leading producer of sugar in Mauritius, including special sugars. We also lead various farming activities to contribute to our country's food self-sufficiency.

Does Mauritius have cogeneration?

Alteo pioneered cogeneration in Mauritius in 1986. Our 41MW biomass/coal power plant supplies steam and electricity to our milling operations and exports electricity to the national grid. Annually, we export an average of 170 GWh of electricity to the Central Electricity Board.

How does the Mauritius power plant work?

The Mauritius power plant generates electricity using photovoltaic inverters. These inverters automatically detect problems and transmit energy production forecasts to the Central Electricity Board every 30 minutes. The plant pioneered cogeneration in Mauritius in 1986 and continues this trend.

How much electricity does Mauritius need?

Compared to 2019, the peak power demand for the Island of Mauritius decreased by 2.6% from 507 MW to 494 MW in 2020, while that of the Island of Rodrigues increased by 6.6% from 7.6 MW to 8.1 MW (Table 7). Some 2,882 GWh (248 ktoe) of electricity was generated in 2020.

What was the peak power demand for Mauritius in 2020?

The peak power demand in 2020 reached 494 MW for the Island of Mauritius and 8 MW for Rodrigues. Compared to 2019, the peak power demand for the Island of Mauritius decreased by 2.6% from 507 MW to 494 MW in 2020, while that of the Island of Rodrigues increased by 6.6% from 7.6 MW to 8.1 MW (Table 7).

What is MSDG & how does it work in Mauritius?

These projects use high end technology to remove production intermittency and generate baseload power. Consequently, this technology aims at replacing coal powered stations in Mauritius. o Under the MSDG medium scale standalone projects are at feasibility stage.
