

The West African region is currently experiencing the challenge of meeting rapidly the growing electricity demand which has played a critical role in the low economic development rate of the region.

Avoiding the most damaging land use and freshwater impacts of solar PV, wind, and hydropower development while halving carbon emissions by 2040 in the Southern Africa region is not only possible ...

The European powers left most of their colonial possessions unprepared for self-rule, one of the worst examples being the Belgian Congo. Brussels had first discussed de-colonization in 1955 when a Belgian report reckoned that the development of a ruling elite in Congo was at least a generation behind other European colonies, and thus Congo needed at a ...

Business Insider Africa presents 10 African countries with the strongest military power in 2024. Egypt is ranked the most powerful military force in Africa and 15th globally. The list is courtesy of Global Firepower.

Consequently, notwithstanding the overall minimal knowledge about African traditional systems of governance, the above piece can serve as lessons from African judicial systems of governance for global understanding as it has lighted the various roles the indigenous African systems of governance continue to play in the modern day Africa.

with support from USAID Power Africa. It considers the potential contribution from BESS to the power system, as well as opportunities, barriers or challenges and recommendations to achieve an optimal contribution to the continental power system. BESS is another form of energy storage, similar to the more familiar pumped storage hydropower.
