

Does the Gambia need more power generation capacity?

The Gambia's power sector will soon need additional generation capacity to be able to cover the forecast demand. A gap between available capacity and peak demand is identified from 2022 with the expiration of the Karpower contract and by 2025 nearly 140 MW of new capacity will be needed.

What is a critical path to achieving universal electrification in the Gambia?

Critical path items are as follows: institutional strengthening, particularly NAWEC's 2019-25 Strategic Development Plan. Within the African continent, achieving universal electrification by 2025 will be a significant achievement in which The Gambia will be able to be justifiably proud.

Should the Gambia import electricity from Senegal or Cote d'Ivoire?

The most important conclusion from the generation planning is that the least cost option for The Gambia is to import electricity from Senegal and/or Cote d'Ivoire. This conclusion is robust in all scenarios considered.

What is the potential of wind capacity in the Gambia?

The potential of wind capacity in The Gambia is estimated to be approximately 197 MW with a capacity factor below 20% and 5 MW with a capacity factor higher than 30%. Generic wind farms were included in the least cost planning analysis and were modelled in blocks of 3.6 MW.
