

Our comprehensive knowledge and attention to detail in the renewables sector, and in particular the solar PV and thermal markets, has seen our client base extend to just under half of all registered installers throughout the UK and Ireland.

Solar array mounted on a rooftop. A solar panel is a device that converts sunlight into electricity by using photovoltaic (PV) cells. PV cells are made of materials that produce excited electrons when exposed to light. The electrons flow ...

This article summarises guidance developed by Hampshire County Council for the assessment of roofs in order to install photovoltaic panels. A guide to assessing existing roofs for the addition of solar panels. Author: ...

The race to produce the most efficient solar panel heats up. Until mid-2024, SunPower, now known as Maxeon, was still in the top spot with the new Maxeon 7 series. Maxeon (Sunpower) led the solar industry for over a ...

Our structural survey for solar panel installations will assess the structural integrity of the roof or other installation location to ensure it can support the weight of the panels. We will check for ...

All solar panel strings connected in parallel have to feature the same voltage, and they also have to comply with the NEC 690.7, NEC 690.8(A)(1), and NEC 690.8(A)(2). Modules need to be the same model in all ...
