

How much energy does Bahrain need?

In order to achieve these objectives, Bahrain will need 280 MW of electricity generation capacity from renewables by 2025, increasing to 710 MW by 2035. According to the Sustainable Energy Authority (SEA), the country is targeting solar, wind and energy from waste to hit these targets.

Why is Bahrain investing in renewables?

Bahrain is also beginning to ramp up investment in renewables as it works towards its goal of reaching net-zero carbon emissions by 2060. The spike in oil prices in early 2022 could offer further incentive for Bahrain to expand its green energy capabilities. In September 2021 Bahrain announced plans to restructure its oil and gas industry.

Does Bahrain have solar energy?

Given Bahrain's climate, solar energy is a vital part of the kingdom's clean energy mix, accounting for 93% of its renewable capacity in 2020. In November 2021 the government inaugurated the Batelco solar plant, which can produce some 1600 MW of power and is expected to reduce the country's carbon emissions by around 900 tonnes.

Will Bahrain invest in alternative energy sources?

Investment in alternative energy sources is also set to expand. Bahrain is monitoring advancements by market pioneers in the hydrogen industry, taking a prudent approach before making significant commitments in this potentially transformative segment.

How big is Bahrain's photovoltaic capacity?

According to estimates by the International Renewable Energy Agency, Bahrain's photovoltaic (PV) capacity was around 10 MW at that time. Large-scale plants offer one way to rapidly scale up renewable energy deployment. One notable project is the Askar landfill site in southern governorate.

Why is Bahrain reorganizing its oil & gas company?

Bahrain's utilities segment is driving demand for new infrastructure and investment due in part to renewable energy and efficiency strategies. The government is restructuring its oil and gas holding company, Bapco Energies.

Therefore, this study examines the impact of economic policy uncertainty and financial development on renewable energy consumption by considering role of economic globalization in renewable energy ...

**BAHRAIN OVERVIEW** Kingdom of Bahrain Power generation in Bahrain Bahrain consumes around 354.6 million m<sup>3</sup> annually supplied through non-renewable groundwater. Agriculture is the largest water consuming sectors at 45%. Desalination provides around 99% of all potable water needs. Water production/withdrawal in
