

For this reason, we started testing a sustainable alternative: charcoal production from bamboo. Bamboo is a local plant that grows quickly and can be harvested repeatedly, plus its roots strengthen soil that is easily eroded, and bamboo charcoal has a high calorific value, making it simple and cheap to produce.

Launched in 2017, Solar Panda has grown quickly due to its high-quality products, affordable pricing, excellent customer service, and direct sales strategy. Now in more than 200,000 homes, Solar Panda () is bringing clean, affordable electricity to over 1 million Kenyans.

5 ???· The Democratic Republic of Congo has inaugurated a 120 kW hybrid solar plant in Mambasa, Ituri province, under the Green Energy Post-Pandemic Initiative. This project aims to expand sustainable energy access in underserved areas.
