

Why do we need a green energy supplier in Belgium?

As a result of the energy transition, to us it is important that the energy we consume is generated in a green way in Belgium. That is why we have opted for an energy supplier who also has its own production in Belgium. With the development of the Bio Energy Base, BEE is becoming the trendsetter for the energy transition in the Ghent Canal Zone.

Who is Leer ons kennen Energy Solutions Group?

Our areas of focus include solar energy, wind energy, rapid charging infrastructure, and energy storage. Leer ons kennen Energy Solutions Group is the largest independent green power producer (IPP) in the Benelux area. ESG currently owns and exploits an operational portfolio of 666 MW representing a total investment of more than EUR ~1,2 bln.

Who is Energy Solutions Group?

As an industrially - focused and internationally - oriented player in the energy sector, Energy Solutions Group is accelerating the sustainable energy transition. We create long-term value through a 'buy and hold' growth strategy, investing in infrastructure that employs proven technologies.

What is Energy Solutions Group's goal in 2027?

It has the ambition to by 2027 grow its operating asset portfolio to 1,600 MW, including 225 public superchargers. To minimize its environmental impact, Energy Solutions Group's goal is to save more than 1 million tons of CO2 annually by 2027.
