

Is Tesla Powerwall a good battery?

Read our full review of the Tesla Powerwall battery. Tesla is often credited with making lithium-ion home storage mainstream with its ultra-sleek, reasonably priced Tesla Powerwall. Since its launch in 2015, the Powerwall remains one of the cheapest home storage options on the market while still performing great!

Is a Powerwall battery a good choice?

The Powerwall battery is easy to use, but because it's connected to your home via AC power, solar energy to be stored in the battery is converted from DC to AC first, meaning the battery is less efficient than one with a direct DC connection to a solar installation. In addition, the Powerwall comes only in one size.

Should you buy a Tesla Powerwall solar battery?

Solar batteries continue to get cheaper, and with widespread power blackouts becoming more common, people want to make sure they have access to reliable electricity. The Tesla Powerwall has been the solar battery of choice for most homeowners, based on brand recognition and ease of use.

What type of battery does the Powerwall 2 use?

The Powerwall 2 uses a lithium nickel-manganese-cobalt (NMC) cell chemistry developed in collaboration with Panasonic as the battery cells are similar to the batteries used in the Tesla electric vehicles. The unit features an integrated battery management system (BMS), liquid thermal management, and inverter charger.

How much does a Powerwall battery cost?

Plenty of other popular brands go for \$15,000 total. The Powerwall holds more electricity than those batteries, though (13.5 kWh vs. 10 kWh, typically), and that extra capacity often helps owners offset enough of their nighttime, non-solar energy use to make up the cost difference. The extra energy can be useful in backup scenarios, too.

Which Powerwall alternative is best?

Our chosen Powerwall alternative from Enphase comes in the form of its 10 kWh IQ Battery offering. While its usable capacity (10.08 kWh) and continuous power rating (3.84 kW) don't quite match up to the Tesla Powerwall's -- 13.5 kWh and 5.0 kW -- it does have a 6% higher round-trip efficiency. 3.
