

Will Belize Electricity compensate you for excess solar energy?

The hope is that through regulations, Belize Electricity Ltd will have to compensate you for excess solar energy flowing to the grid during the day and off-set it against the electricity you are drawing from the grid at night; however, the reality today is the opposite.

Is a grid-tie Solar System a viable option?

If your monthly electricity bill exceeds BZD 500 and your energy consumption is mostly during the day, then adding a grid-tie solar system with or without battery back-up is more economically viable than going completely solar off-grid. Will my grid-tie solar system stay on during a grid outage?

Does SESB offer solar air conditioners?

With an SESB grid-tie solar system all your household appliances, including your air conditioner, are powered by solar during the day. SESB does not provide solar powered air conditioners. Will it make sense to disconnect from BEL grid and go completely solar off-grid?

Solar energy brings power to Belize's most remote, disconnected places. It harnesses the incredible, clean, energy of the sun to provide versatile, quiet, reliable power 365 days a year. If you have a property off-grid, have a home or business which suffers disruption to supply on a frequent basis or are looking to reduce your energy bills and ...

Belize would not be the first Caribbean country to utilize this abundant resource, this title goes to Suriname. Suriname is a much larger country but was capable of producing 23% of its electricity with the use of wind turbines (Sterl et al). Similarly, Suriname had pre-established hydroelectricity production at three dams within the country.
