We provide a wide range of domestic/commercial pv systems and battery storage solutions for our customers. Every job is tailor-made to suit your needs. We design bespoke systems based on maximum return on investment.

Bolivia's overall energy mix is dominated by fossil fuels, with natural gas (50%) and petroleum products (31%) supplying most of the country's energy in 2020. [1] In 2021, Bolivia's national electricity agency ENDE announced its intention to generate up to 80% of the country's power from renewable sources by 2025. [2]

Next Energy makes your home or business more energy efficient. Specialising in renewables, insulation, and heating systems, we provide energy saving measures by way of retrofit for our clients across a high number of funded schemes and private contracts.

As part of the UK government's initiative to cut carbon emissions, grants are available to fund energy-efficient upgrades to homes with low energy ratings. If you are living on a low-income or receive income-related benefits, you could be eligible to receive full funding for home insulation, air source heating and solar panel energy.
