How many energy audits have been performed in Bosnia & Herzegovina?

al energy consumption. The registers of energy certificates of buildings, which have been established in the Republika Srpska and in the Federation of BiH, show that a total of 1203 energy auditsof buildings have been performed in Bosnia and Herzegovina so far, i.e. 1203 certifi

Does Bosnia and Herzegovina have a framework for energy labeling?

ergy Community Treaty. In this regard, Bosnia and Herzegovina has an obligation to establish a framework for energy labelingand to adopt certain regulations on e ergy-related products. This Regulation establishes a framework applicable to energy-related products (" products ") placed on the mark

What does the renewables readiness assessment mean for Bosnia & Herzegovina?

"The Renewables Readiness Assessment represents an important step in the process of gradual transition from fossil fuels to renewable energy sources on the way to the decarbonisation Bosnia and Herzegovina's energy sector by 2050, for which we are grateful to IRENA.

What is the public sector doing in Bosnia and Herzegovina?

ministries and funds. The activities conducted by the public sector in Bosnia and Herzegovina so far have been carried out individually, by making efforts to establish a strategic, legislative and regulatory framework for energy efficiency, and by implementing projects for energy renovation of building

Why should Bosnia and Herzegovina invest in an integrated strategy?

An integrated strategy will provide investors with certainty and predictability, leading to a diversified economy and sustainable jobs creation. "The forthcoming National Climate and Energy Plan will put Bosnia and Herzegovina on the right path to ensure the energy security while improving its long-term resilience to climate change.

Is biomass a source of electricity in Bosnia & Herzegovina?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Bosnia and Herzegovina: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

Bosnia and Herzegovina consumed 251,753,830,000 BTU (0.25 quadrillion BTU) of energy in 2017. This represents 0.04% of global energy consumption. Bosnia and Herzegovina produced 141,510,439,000 BTU (0.14 quadrillion BTU) of energy, covering 56% of its annual energy consumption needs.

The energy sector of Bosnia and Herzegovina (BiH) is in a demanding process of transformation from being a traditional, predominantly fossil fuels sector to a renewable energy sector. This, together with the

Bosnia and Herzegovina: Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for your chosen country across all of the key metrics on this topic.

The Renewables Readiness Assessment: Bosnia and Herzegovina finds that integrated short- and long-term strategies that aim to increase the share of diverse renewables will not only lead BiH to address those impacts, but also ensure its energy security and increase its readiness to join the European Union (EU).

Bosnia and Herzegovina is well endowed with renewable energy resource potential; however, the sector is still in its initial stage of development. While biomass is the most abundant renewable energy resource, there is also significant potential for ...

Bosnia and Herzegovina is a self-sufficient, net exporter of electricity. However, its energy sector relies mostly on fossil fuels, in addition to hydro and a negligible level of other renewables. In 2021, the largest source of energy in Bosnia and Herzegovina was coal (51%), followed by oil with 22% contributing to the total energy supply.

Under its draft NECP (2023), Bosnia and Herzegovina aims to reach a share of 43.6% of renewables in final energy consumption by 2030 (up from 36.6% in 2021), including 70% for electricity, 61% for heating and cooling, and 8.4% for transport (46%, 53%, and 0.2%, respectively, in 2021).

The Energy Efficiency Action Plan in Bosnia and Herzegovina (NEEAP 2019-2021, drafted) defines national targets for reducing final and primary energy consumption for the threeyear period 2019- - 2021. The goals are defined based on the trajectories of final (TFEC) and primary (TPES) energy, which
