

What are the French Southern & Antarctic Lands?

The French Southern and Antarctic Lands are an overseas territory of France that consist of the following: Adélie Land (Terre Adélie): This is the French claim on the continent of Antarctica. Crozet Islands (Îles Crozet): A group of islands in the southern Indian Ocean, located south of Madagascar.

What is the French Southern Territories?

The territory is sometimes referred to as the French Southern Lands (French: Terres australes françaises) or the French Southern Territories, usually to emphasize non-recognition of French sovereignty over Adélie Land as part of the Antarctic Treaty System. The entire territory has no known permanently settled inhabitants.

Why are the French Southern & Antarctic Lands subject to an original form of governance?

These characteristics explain why these territories are subject to an original form of governance. The French Southern and Antarctic Lands include uninhabited territories in the Indian and Southern Oceans. Image: TAAF

What is the French Southern Territories nature reserve?

In 2006, the French Southern Territories Nature Reserve was created around the Crozet archipelago and the Kerguelen, Saint-Paul and Amsterdam islands. This reserve, which by 2022 will cover an area of 1.6 million km², is one of the largest marine protected areas in the world and has been a UNESCO World Heritage Site since 2019.

Does France have territorial sovereignty over the Éparses Islands?

Although France's claim to the three austral lands (Kerguelen, Saint-Paul and Amsterdam and Crozet) is no longer contested, it is facing two major challenges to its claim to territorial sovereignty over the Éparses islands.

Are there trees in the French Southern Lands?

Because of their isolation and subpolar location, the French Southern Lands are relatively depauperate of vegetation, with both Saint-Paul and Crozet having no native tree or shrub species. However, eight of the 36 higher plant species are endemic.

The French Southern Territories are largely uninhabited, with the exception of scientific personnel and military personnel. The population varies from 150 to 310 people throughout the year, depending on the research activities. There are no permanent residents, and the people who do live there temporarily are mostly French scientists, engineers ...

Aside from all the factors mentioned above, investors also fancy Vietnam's growing energy needs. Experts conclude that renewable energy is the cheapest and also the only way to close the supply-demand gap and energy consumption going forward. In fact, by 2022, it could be cheaper to build solar farms than to operate existing coal-fired power plants. On top of renewable ...
