

What are the energy planning strategies for Burundi?

Energy Planning Strategies for Burundi The Burundian energy supply highly depends on traditional use of biomass. The literature shows that the power supply of this country mainly relies on hydropower generation. Many hydropower projects are under development to increase the electricity access of this country .

What will become the Burundian power sector in long-run?

Although the country is endowed with a huge potential for various energy resources , there is higher uncertainty about what will become the Burundian power sector in long-run. This uncertainty is higher as the target of reaching 30% of electrification rate in 2030 is still far from the current situation (Fig. 2).

What type of energy is used in Burundi?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Burundi: How much of the country's energy comes from nuclear power?

Does Burundian power supply match domestic energy demand?

As the Burundian power supply not matching the domestic energy demand , the energy needs is mostly represented by traditional biomass at about 96% of total energy consumption, mostly used for cooking in rural areas (in traditional way) and urban areas as charcoal .

How MCDM & computer based tools can help Burundian decision makers?

The use of MCDM and computer based tools can guide the Burundian decision makers to have a clear view on future planning of available energy resources and then recommend investors on priority energy technologies.

Why is energy demand increasing in Burundi?

Limited capability and resources to improve energy efficiency are also the main factors contributing to the increase of Burundian energy demand. Incorporating these factors into energy demand forecasts is crucial for a capital constrained developing country, like Burundi, where reliable energy supply capability is limited. 4.2.
