

Who makes Piller Power Systems?

Established in 1909, Piller Power Systems is Europe's leading producer of uninterruptible power supply (UPS) systems for mission-critical power applications such as data centres and semiconductor manufacturing. Piller also manufactures ground power systems for civil and military airports and on-board electrical systems for naval vessels.

What is Piller Power Technology?

Piller power technology protects the world's critical infrastructure. Established in 1909, Piller Power Systems is Europe's leading producer of uninterruptible power supply (UPS) systems for mission-critical power applications such as data centres and semiconductor manufacturing.

Who is Piller?

Regional Offices Piller offers the aviation industry customised system solutions in high-quality energy conditioning, an uninterruptible power supply and frequency conversion. Piller is a world leader in mission-critical uninterruptible power systems and has been renowned for the quality of its products and services since its formation in 1909.

Which rotary UPS are made by Piller Power Systems?

Piller Power Systems manufactures high capacity rotary UPS, hybrid rotary UPS, diesel rotary UPS, static UPS and static transfer switches.

What is a Piller UPS system?

Piller UPS systems are found in mission critical applications up to 50MW where continuous and stable power is paramount such as Microgrids and Island grids, data centres, financial institutions, broadcasting, as well as telecommunication networks, airports, healthcare facilities etc.

Why should you choose Piller?

At the forefront of mission-critical UPS systems, Piller excels in providing comprehensive solutions. Our offerings span kinetic energy storage systems, ground power units and 50/60Hz frequency converters.

Who is Piller Power Systems. Founded in 1909 and headquartered in Osterode, Germany, Piller Power Systems is a power protection technology that builds electrical systems for mission-critical applications worldwide. Read more. Piller Power Systems's Social Media

Piller Power Systems | 8,412 followers on LinkedIn. Nothing protects quite like Piller | „Nothing protects quite like Piller" - with this principle Piller is a world leader in power protection technology and builds electrical systems for mission-critical applications worldwide. Clients include many of the world's central and commercial banks, stock exchanges and other financial ...

The CPM concept brings together a highly efficient and reliable energy store with a multi-mode uninterruptible power system. There are two principle modes of operation providing real power protection and the unit can operate with exceptional efficiency that is above 96% at 25% load and approaching 99% at full load.

Fondata nel 1909, Piller Power Systems è il principale produttore europeo di sistemi di continuità (UPS) per applicazioni di alimentazione mission-critical come i data center e la produzione di semiconduttori. Piller produce anche sistemi di alimentazione a terra per aeroporti civili e militari e sistemi elettrici di bordo per navi militari.

As demand from AI gathers pace, every data center operator is asking the same question: "Where will the power come from?" Keith Maclean-Martin, Technical Director at Piller UK, talking to Data Center Dynamics" Stephen Worn, outlines an innovative power solution that eliminates UPS, batteries and back-up generators entirely. By 2026 the global power demand ...
