

What is the energy sector in Cape Verde?

Cape Verde energy sector is strongly characterized by consumption of fossil fuels (derived oil-primary imported oil), biomass (wood) and use of renewable energy particularly wind and solar power.

Does Cape Verde have biomass?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Cape Verde: How much of the country's electricity comes from nuclear power? Nuclear power - alongside renewables - is a low-carbon source of electricity.

How does Manuel Nunes help Cape Verde?

Cape Verde is an archipelago making it an expensive challenge to connect the various islands to the electric grid. Manuel Nunes helps remote island communities, who find it a challenge to meet electricity costs, with affordable solar panels allowing them access to renewable and cheaper electricity.
