In 2021, Honduras" energy mix was led by oil, constituting 52.3% of the total energy supply, followed by biofuels and waste at 33.7%. Modern renewables, which exclude traditional biomass practices like burning wood or agricultural residues, accounted for ...

Regulations that aim to attract increased investments in the deployment of variable renewable energy can improve energy access and meet the electricity needs. The report finds that Honduras has high-quality solar potential for electricity production.

La empresa Honduran Green Power Corporation SA de CV inauguró en el municipio de Choloma la planta de energía eléctrica de 43 MW, la cual opera en base a la combustión de biomasa. La energía es destinada al consumo de clientes privados y la Empresa Nacional de Energía Eléctrica.

OverviewEnergy sourcesLegal and policy frameworkSee alsoSources In 2021, Honduras" energy mix was led by oil, constituting 52.3% of the total energy supply, followed by biofuels and waste at 33.7%. Modern renewables, which exclude traditional biomass practices like burning wood or agricultural residues, accounted for 13.7%, while coal made up just 0.3%. Currently, 33 percent (502 MW) of the installed capacity of the national interc...

In 2014, Honduras approved a new Law of Electrical Industry, which establishes technology-specific auctions for renewable energy. 75% of the population has access to electricity in the country and only 48% can rely on clean cooking facilities.

Honduran Green Power Biomass Power Plant is a 45MW biopower project. It is located in Cortes, Honduras. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently active.

Honduras is a regional leader in solar energy, with roughly 11% of electricity provided by photovoltaics in 2018 and 2019. As of 2016, the country ranked first in Central America for installed solar capacity and third in Latin America behind Chile and Mexico. Honduras aims for 80% of its energy matrix to be from renewables by 2038.

La preturile din prezent de pe piata, cu 1MW fotovoltaic instalat costând minim 800.000 de euro, investitia totala ce ar urma sa se realizeze la Lunca Muresului s-a ridica la ...

This Renewables Readiness Assessment (RRA), developed in co-operation with the Honduran Energy Secretariat (SEN), identifies key barriers and solutions to meet Honduras" targets for renewable energy
