Answer: The ESS Power Case is specially designed for the ESS battery. It is designed to accommodate up to 2 ESS modules and also has 3 connection points for PV modules or additional batteries with a maximum power of up to 11.4 kW (15A), similar ...

Answer: The main function of the ESS Power Case is to connect and integrate the battery with Ferroamp's DC grid through the ESO(s) mounted in designated locations within the ESS Power Case. You can read more about the function of the ESO here. T...

Answer: The ESS system can be built in stages where the smallest number of battery modules is 2 in a stack, which can later be expanded to 3, 4, and 5 modules in a stack. This means that it's possible to increase the storage capacity from 7.1 kW...

The ESS Power Case can be configured with either 1 or 2 ESO Modules depending on the power configuration of the ESS System. 1. Unpack the ESO Module and remove the pre-installed connector (if it has one), the back connector will not be needed for the installation. To remove the connector unscrew the two screws then pull off the connector. 2.
