

Why is Central African Republic investing in electricity?

With an electrification rate of 35% in Bangui, 8% in the main provincial cities and towns, and only 2% in rural communes, the Central African Republic has invested in the energy sector as an engine of development to increase access to electricity and promote sustainable growth.

Will Central African Republic have electricity by 2030?

By 2030, almost half of the population of the Central African Republic should have access to electricity, compared to only 16% at present. Today, the Central African Republic is launching a new 25-megawatt solar park with battery storage in Danzi village, located around 18 kilometers from Bangui.

Where is Central African Republic launching a new solar park?

BANGUI, November 17, 2023 - Today, the Central African Republic is launching a new 25-megawatt solar park with battery storage in Danzi village, located around 18 kilometers from Bangui. The park will supply electricity to 250,000 persons in the capital, almost doubling the country's electricity generation capacity.

Why does Central Africa need an energy mix?

This is a unique capacity which allows Central Africa to achieve an energy mix and also to boost its electrical power for industrialization and social development needs (health, education, household).

What are the challenges faced by the electricity sector in Bangui?

The electricity sector is characterized by inadequate infrastructure, a weak policy and regulatory framework, and a utility that is struggling to recover costs and thus maintain and expand its services. Only 14.3% of the country's population has access to electricity, with rates ranging from approximately 35% in Bangui to about 0.4% in rural areas.

How can Central Africa add value to its exports?

The countries of Central Africa are now aware and committed to turning their backs on the volatile and unsustainable resources rent with a low impact on job creation, poverty reduction and growth intensification. To add value to their exports, it is necessary to strengthen economic structures by diversifying and adding value to exports.

Demographic profile. The Central African Republic's (CAR) humanitarian crisis has worsened since a coup in March 2013. CAR's high mortality rate and low life expectancy are attributed to elevated rates of preventable and treatable diseases (including malaria and malnutrition), an inadequate health care system, precarious food security, and armed conflict.
