

Central African Republic high up solar system

Where is Central African Republic launching a new solar park?

BANGUI, November 17, 2023 - Today, the Central African Republic is launching a new 25-megawatt solar park with battery storage in Danzi village, located around 18 kilometers from Bangui. The park will supply electricity to 250,000 persons in the capital, almost doubling the country's electricity generation capacity.

Will Central African Republic have electricity by 2030?

By 2030, almost half of the population of the Central African Republic should have access to electricity, compared to only 16% at present. Today, the Central African Republic is launching a new 25-megawatt solar park with battery storage in Danzi village, located around 18 kilometers from Bangui.

How will Jinko Solar help Central African Republic?

The Central African Republic faces a severe shortage of electric power and struggles with significant power supply challenges. However, JinkoSolar's high-efficiency modules will provide a reliable source of clean energy, greatly improving electricity efficiency and promoting the utilisation of clean energy in the region.

How did the World Bank help the government build a new solar park?

To fast track its construction, the World Bank directly supported the government in procuring resources and supplies. "It's a great joy," says Thomas Bissafi, the village chief of Danzi, a town in Central African Republic about 18 kilometers away from the capital of Bangui that is now home to a new solar park. "It's helping to develop the country."

Why is Central African Republic investing in electricity?

With an electrification rate of 35% in Bangui, 8% in the main provincial cities and towns, and only 2% in rural communes, the Central African Republic has invested in the energy sector as an engine of development to increase access to electricity and promote sustainable growth.

Will a large solar plant in Bangui help other countries?

Residents in Bangui used to face up to 16 hours of load shedding with health facilities, schools, and shops with no electricity. Now they will have much greater access to power, driving productivity and job creation. The commissioning of such a large solar plant in CAR provides hope for other countries.

In a landmark move towards sustainable development, the Central African Republic inaugurated the Danzi solar park, a 25-megawatt solar facility equipped with battery storage, situated just 18 kilometers from the capital, Bangui.
