

How much do solar panels cost?

Finding the lowest possible price tag for your solar panel installation might sound like the best way to save money when you go solar, but the payback period of your solar panel system might take twice as long, and your panels may never earn the return you expected. In 2024, the average cost of solar panels is around \$2.86/W before incentives.

What are the best Cheap solar panels?

Based on our latest Intel Report, we've compiled a list of the best cheap solar panels that are as reputable as they are affordable. AXITEC, Jinko Solar, LONGi Solar, REC Group, and QCELLS are our top picks for the best cheap solar panels based on their price per watt (\$/W) and performance.

Which solar panels are the most expensive?

REC Group produces efficient, high-performance solar panels comparable to premium brands like SunPower and Maxeon--but about 19% cheaper. QCELLS solar panels are the most expensive on our list but still among the least expensive and most popular solar panels quoted on EnergySage.

How much do solar panels cost in 2024?

In 2024, the average cost of solar panels is around \$2.86/W before incentives. Between falling prices, incentives and rebates, and flexible financing options, you likely won't need to pay serious cash out of pocket to get the best solar panel deal.

Are solar panels affordable?

Solar panel affordability continues to increase thanks to falling prices, incentives, rebates, and flexible financing options. The solar panel with the cheapest price tag may not be the most cost-effective option in the long term. Consider efficiency, performance, and warranties when comparing your options.

Is LONGi Solar a good brand?

LONGi Solar produces high-efficiency PERC solar cells at an incredible price. While other brands offer better warranties and temperature coefficients, LONGi solar panels' efficiency ratings are up there with some of the top brands on the market.
