

Who is cleantech solar?

Mumbai,14 February,2024: Cleantech Solar,a leading provider of renewable energy solutions to corporations in India and Southeast Asia,... Part of three-year collaboration with Shell to explore decarbonisation solutions in the built environment Turnkey solar solutions by Cleantech Solar...

Why should we partner with Cleantech solar?

We are very pleased to partner with Cleantech Solar,for their support to achieve the first milestone of our vision w.r.t Renewable Energy and we appreciate them for their high-quality,cost-competitive and environment-friendly solar power. These solar projects will help us to move towards carbon neutrality."

Why is Gyproc partnering with Cleantech solar?

Mr. Venkat Subramanian,Managing Director,Gyproc business at Saint Gobain India Pvt. Ltd. "We are delighted to partner with Cleantech Solar and strongly believe that going forward,renewable energy is going to have a big role in how businesses conduct themselves.

Is senior aerospace (Thailand) partnering with Cleantech solar?

"Senior Aerospace (Thailand) Ltd. is very happyto have engaged and partnered with Cleantech Solar in one of many of our steps in pursuing ongoing emissions reduction targets." - Mr. Simon Geoffrey Shale,CEO at Senior Aerospace (Thailand) Ltd.,said:

Highlights from the projects included cyclone-proof wind turbines, space-optimising solar solutions, and plants providing 50% of local energy requirements. The UAE-Pacific Partnership Fund was launched in response to the identification of renewable energy as a key growth enabler at the January 2012 Pacific Leaders" Meeting of the ...

Cleantech Solar is a developer that finances, constructs, owns and operates wind and solar photovoltaic projects. We are headquartered in Singapore and operate across Asia, focusing on long-term investments within the commercial and ...

Cleantech Solar is a developer that finances, constructs, owns and operates wind and solar photovoltaic projects. We are headquartered in Singapore and operate across Asia, focusing on long-term investments within the commercial and industrial customer segments.

The team has developed a unique new financing mechanism that has the potential to be applied across various rural communities, not only in the Solomon Islands. If the islanders were not able to pay for solar lanterns with ...

Known as PIGGAREP (The Pacific Islands Greenhouse Gas Abatement through Renewable Energy Project),

this project aims at helping 11 Pacific islands overcome their barriers to using effective renewable energy technologies, including the Solomon Islands.

The project will finance new solar farms in Guadalcanal and Malaita province, along with a utility-scale grid-connected energy storage system in Honiara. Nearly all of Solomon Islands' grid power is diesel generated.

The Solomon Islands Renewable Energy Development project will help deliver solar PV power plants with a total capacity of 2.5MW and help facilitate the development of what the ADB...

Small islands, rich in renewable energy resources, can become clean energy innovation hubs. Although many generate less than 10% of their electricity from renewables, total installed capacity in SIDS more than doubled between 2010 and 2022, reaching 4.6 ...

Solomon Power also supports the installation of small scale grid connected micro embedded generators that convert renewable energy into electricity that can be used in your home or business premises. Sources of renewable energy can ...

Known as PIGGAREP (The Pacific Islands Greenhouse Gas Abatement through Renewable Energy Project), this project aims at helping 11 Pacific islands overcome their barriers to using effective renewable energy ...

Solomon Power also supports the installation of small scale grid connected micro embedded generators that convert renewable energy into electricity that can be used in your home or business premises. Sources of renewable energy can include solar photovoltaic cells (PV) or micro-turbine systems.

The team has developed a unique new financing mechanism that has the potential to be applied across various rural communities, not only in the Solomon Islands. If the islanders were not able to pay for solar lanterns with cash, reasoned the project developers, why not pay with crops?
