

Is the market for PPAs growing in Portugal?

The market for PPAs in Portugal is growing, with a significant milestone being its first closed corporate PPA transaction in 2023.

Why did Aquila acquire a series of PPAs in Portugal?

Aquila Capital Director of Power Markets Iberia, Marcos Dominguez, said: "This is the first time we have secured a series of PPAs for an entire portfolio in Portugal. The agreement supports our ambition to drive the energy transition forward and our commitment to a carbon-free economy."

What is a long-term PPA?

The long-term PPAs have a competitive price structure and a duration of between five and seven years. Axpo Iberia will purchase renewable energy from the four solar plants, which are part of Aquila Capital's Portuguese portfolio of around 700 MW, and provide them with representation services.

Which countries use PPA financing?

Generally, PPAs are more common in the United States. However, this form of financing has gained traction in the European Union over the last few years, where it has been used to finance almost 9 GW of production, led by large contracts in Spain and Scandinavia.

How can financial institutions support PPAs?

Financial institutions can in theory support PPAs through provision of tailored debt, equity, or credit guarantees, financial derivatives on power prices.

Are PPAs a good choice for I&C in Spain?

These have largely been corporate PPAs with both data centres and heavy industry offtakers. Spain has seen over 10% of I&C demand contracted through commercial PPAs over the last few years, primarily through utility offtakers.
