

Why is Cabo Verde a good place for wind power?

The Cabo Verde archipelago is one of the best sites for wind power generation since it is located in the northeast trade winds belt. Wind power was first deployed here in 1994. The government set a target to generate 50% of its energy from renewable energy sources by 2020 and ultimately, 100%. This was due to:

Does Cape Verde have solar power?

In 2012 Cape Verde had an installed electricity generation capacity of around 300 MW, of which about 24% from wind power plants and 3% from photovoltaic stations. While solar power has an enormous potential as a source of renewable energy, natural conditions in Cape Verde are one of the best in the world for the production on wind energy.

Will Cabo Verde privatize Electra?

" The project will build on recent efforts from the World Bank to support the Government of Cabo Verde in the privatization of the electricity utility ELECTRA. A first step has been taken with the enactment of the power sector reform decree law, supported by the Cabo Verde First Equitable and Sustainable Recovery Development Policy Financing.

Does Cabo Verde have a photovoltaic power plant?

Excess energy produced in the photovoltaic power plant is used by fishermen for refrigeration purposes. Monte Trigo is the only 100% green village in Cabo Verde. The diesel generator previously used has barely been used since the completion of the project in 2012.

How will the Electra project support the government of Cabo Verde?

Finally, the project will support the Government of Cabo Verde's goal to mobilize private and public capital for energy sector investments, by increasing stakeholders' capacity and supporting the restructuring and privatization of the electricity utility ELECTRA.

Is Cape Verde a viable alternative to fossil fuels?

Solid waste can also represent an adequate option while ocean and geothermal energy are being tested, with uncertainties remaining as to their efficiency. Cape Verde has an estimated potential of 2,600 MW of renew-able energy, and more than 650 MW have been studied in concrete projects, which have lower production costs than fossil fuels.

The Dynamic Power portfolio of hybrid power solutions enables you to sustainably provision, control, and manage your power infrastructure. Always-On Power Management Leveraging energy storage systems and distributed energy resources, Dynamic Power solutions ensure resilience and reliability, even during significant events or fuel access ...
