I had stated in another post if they just replaced the batteries in the Prime with the newer NCM 811 they could get 113 km (~70 miles), maybe more with updated EV efficiencies in motors and Inverters. Would Toyota do a direct raw replacement? No, they would make the battery smaller and lighter and maybe extend the EV range between 88 to 98 km.

Tadiran Batteries GmbH - one of the leading manufacturers of primary non rechargeable lithium batteries in Europe. The company was founded as a Joint Venture between Tadiran and Sonnenschein in 1984 and - under the name of ...
