

How can Djibouti achieve its energy goals?

Djibouti's substantial potential for geothermal electricity generation, along with its rising capacity to produce energy from wind and solar power plants, should help the country reach its goals in coming years. In addition to the growing need for generation capacity, the expansion of renewable energy is key for Djibouti to diversify its economy.

Will Djibouti become the first African country to meet 100% electricity demand?

The authorities have announced plans to transform Djibouti into the first African country to fulfil 100% of its electricity demand from clean energy sources by the close of the plan in 2035. The Ministry of Energy and Natural Resources formulates policies for the sector and regulates the electricity market.

How much electricity does Djibouti produce in 2021?

Djibouti produced 654,062 MWh of electricity in 2021, according to figures from the Central Bank of Djibouti, representing a 4.3% increase relative to 2020. Improving domestic energy production will require the government to direct private investment towards electricity generation.

How does Djibouti produce electricity?

This is mostly supplied by thermal power plants that utilise oil and diesel as fuel. The two primary plants in Djibouti City have a combined generation capacity of roughly 122 MW, with two smaller plants located in Obock and Tadjoura.

Does Djibouti need hydropower?

Djibouti has long relied on trade to supply a significant part of its energy needs due to its lack of hydrocarbons reserves. In recent years it has tapped clean hydropower from neighbouring Ethiopia via interconnected electricity infrastructure.

Will Djibouti move towards energy independence?

However, long-term development prospects will require Djibouti to move towards energy independence by investing in domestic production.

Erden, who has been working in various private companies and positions in the energy sector for many years, has been working as CEO at RENECORE Enerji Yatirimlari A.S. since 2022. Before his current position he worked as Vice President at RHG Enerji Yatirimlari A.S. and also he served as Vice President in charge of Business ...
