

Who is Drax Group plc?

Drax Group plc, trading as Drax, is a power generation business. The principal downstream enterprises are based in the UK and include Drax Power Limited, which runs the biomass fuelled Drax power station, near Selby in North Yorkshire. The Group also runs an international biomass supply chain business.

Where is Drax Power Station?

Drax power station is an operating power station of at least 2676-megawatts (MW) in Drax, Selby, North Yorkshire, United Kingdom with multiple units, some of which are not currently operating. It is also known as UK Oxy CCS Demonstration Project (White Rose CCS Project). The map below shows the exact location of the power station. Loading map...

Who owns Drax Power Station?

In 1990, the electricity industry of England and Wales was privatised under the Electricity Act 1989. Three generating companies and 12 regional electricity companies were created. As a result of privatisation, Drax Power Station came under the ownership of National Power, one of the newly formed generating companies.

How many people work at Drax?

In 2012, Drax employed over 700 people and provided about 7% of Britain's electrical power demand. The six units were served by independent wet limestone-gypsum flue gas desulphurisation (FGD) plant. The station's chimney is the tallest in the UK.

What happened to Drax Power Station?

One significant change was the emergence of vertically integrated companies, combining generation, distribution and supply interests. In certain cases, it became necessary for generation assets to be divested, and so in 1999 Drax Power Station was acquired by the US-based AES Corporation for \$1.87 billion (US\$3 billion).

Why did Drax push back the start of new gas-fired power stations?

In November 2024, Drax Group Plc pushed back the start of three new gas-fired power stations in South Wales, Suffolk, and Bedfordshire to next year because of delays in getting the units connected to the grid. Drax had previously stated that the facilities would start in Autumn 2024. Drax Group's key asset is Drax Power Station.

The control room is the nerve centre of Drax Power Station. From here technicians have a view into every stage of the power generation process. The entire system controls roughly 100,000 signals from across the power station's six generating units, water cooling, air compressors and more.
