

Looking to improve its offerings for preserving data cost-effectively, EMC has refreshed its Centera line by reworking the archiving software so it can be accessed by disparate platforms.. The Centera Universal Access (CUA), a software appliance unveiled today, supports non-integrated applications built on Windows, Linux, Unix and IBM's iSeries platforms.

Dell EMC Centera is an archiving system that uses objects as storage elements with the application or the Centera Universal Access server storing the objects using an Ethernet interface. Dell EMC Centera introduced a new protocol for transferring data and identifying the objects being stored: Content Addressable Storage or CAS.
