How good is enact proposal software?

"The Enact proposal software is super easy to use and good at figuring out how many panels and batteries you need for solar projects. I also really appreciate the efficient and responsive customer service."

Why do you still use enact?

"We've been using Enact now for 5 years, and why we still stay with them is their affordable monthly fee to create as many of our own proposals, we can also have Enact create proposals for us which takes less than 24 hours. It has always been easy to reach them and appreciate how friendly they've been over the years."

Enact is the only two-sided platform that allows customers- both homes and businesses- to simplify their entire solar and energy storage purchase, designed on Enact and delivered by local solar professionals. Enact also enables thousands of professionals in 35+ countries to deliver projects and manage assets for long-term performance.

Off grid photovoltaic systems are completely independent of the grid. The energy produced by the solar panels are collected and stored in special batteries that are rechargeable. A device called a charge controller regulates the raw DC power to prevent overcharging and protect the batteries. Batteries store energy in the form of Direct Current, therefore another device called an inverter ...

The clock is ticking for Jamaica to take control of its energy future. JPS's current licence is set to automatically renew in 2027, meaning that the government has a limited window of opportunity to enact meaningful change.
