

Why is Benin reliant on electricity imports?

Benin is reliant on electricity imports for a significant share of its energy supply. Reform programmes, including plans for electrification, have been put in place in the country, where only 30% of the population had access to electricity in 2017.

What is the energy mix in Benin?

Energy in Benin has a diverse energy mix and takes several forms including: solar, wind, hydropower, biomass, fossil resources, and mineral resources. Out of this energy mix, about 60% of energy comes from biomass. Benin is also dependent on energy imports from Ghana and Côte d'Ivoire.

Where does Benin get its electricity from?

Benin imports some of its electricity from Nigeria through the CEB-NEPA Power Interconnection, commissioned in 2007. There is a disparity of access between urban and rural citizens. In 2010, around 34.2% of the population had access to electricity.

Is Benin a resource rich country?

Benin is a coastal country located in the Gulf of Guinea in Western Africa, which is a resource rich region. Energy in Benin has a diverse energy mix and takes several forms including: solar, wind, hydropower, biomass, fossil resources, and mineral resources. Out of this energy mix, about 60% of energy comes from biomass.

Does Benin have energy resources?

While Benin has many energy resources, it lacks the infrastructure both to convert these resources into electricity and to transport the electricity throughout the country. Energy resources in Benin and most Western African countries are not evenly distributed.

Is biomass a good energy source in Benin?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Benin: How much of the country's energy comes from nuclear power? Nuclear energy - alongside renewables - is a low-carbon energy source.
