

The projects are located in the greater Los Angeles area. Image: Slices of Light/Flickr. New Goldman Sachs-backed developer GridStor has acquired a portfolio of in-development battery storage projects in LA, California, from Upstream Energy, totalling 500MW/2,000MWh.

Silicon Valley Power (SVP) has selected Ameresco, a Massachusetts-based renewable energy developer, to build a 50MW/200 megawatt-hour (MWh) battery energy storage system (BESS) in Santa Clara, California, US. The BESS project, known as Kifer Energy Storage, will offer additional local area capacity with a reliable and flexible electrical system.

Energy storage can provide a multitude of benefits to California, including supporting the integration of greater amounts of renewable energy into the electric grid, deferring the need for new fossil-fueled power plants and transmission ...

The California ISO's (CAISO) Resource Adequacy programme, through which utilities secure capacity from generating units, only requires a four-hour duration for energy storage. Energy-Storage.news has asked CPA for more details and will update this article in ...

Augmentation at the Vistra Moss Landing Energy Storage Facility in California has been completed, with the world's biggest battery energy storage system (BESS) now at 400MW / 1,600MWh. ... "The energy storage facility that Vistra is deploying in Moss Landing will help us build a more reliable, low-emission grid, providing zero-emission ...

Convergent Energy + Power has celebrated the successful commissioning and start of commercial operations at two battery energy storage system (BESS) projects with a combined capacity of 60MWh in California, US. The energy storage developer said yesterday that the two storage systems it financed and developed in California's Orange County are ...

5 ???&#0183; The solar portion provides 384 MW of power capacity, while the energy storage component provides 150 MW/600 MWh of power and energy storage capacity. Also, this is just ...

Earlier this year, Alamitos, another 100MW / 400MWh California battery storage project was inaugurated by power producer AES Corporation and its part-owned BESS technology company Fluence, with that one chosen over a new-build natural gas project, while utility Florida Power & Light said installation of batteries has begun at Manatee Energy ...

Long-time readers of Energy-Storage.news over the past 10 years will recall that as California's AB2514 legislation put in place a mandate for the IOUs to procure 1.325GW of energy storage between them by 2020,

an outsized portion of our reporting was driven by activity in the California Independent System Operator (CAISO) bulk power system.

The energy storage division opened in 2020, following the company's 2017 acquisition of energy storage developer Viridity. Ormat decided to enter the market to broaden its revenue base and noted in 2020 that the COVID-19 pandemic impacted revenues from its geothermal power generation and development as well as waste-to-heat generation.

The project in Goleta, California, as it looks under construction. Image: Gridstor. Updated 8 June 2023: Gridstor VP of policy and strategy Jason Burwen offered some more details on the project to Energy-Storage.news. The ...

Recent developments reported by Energy-Storage.news include a 2.1GWh, three-project portfolio of BESS that will be owned by utility Southern California Edison and a 226MWh build-out of vanadium flow battery storage at solar PV sites by community energy supplier Central Coast Community Energy.

California now has more than 10GW of battery storage, with Governor Gavin Newsom hailing the state's "energy storage revolution," which is underway. Cumulative installations have now reached 10,379MW in the state, ...

NextEra is one of the largest clean energy operators in the US, and owns this BESS, the Desert Sunlight Battery Energy Storage System project. Image: NextEra Energy Resources. Independent power producer (IPP) ...

Earlier this year, Alamos, another 100MW / 400MWh California battery storage project was inaugurated by power producer AES Corporation and its part-owned BESS technology company Fluence, with that one chosen over ...

Pictured is California's largest flow battery installation. Image: SDG& E / Ted Walton. A group representing community energy suppliers in California has made its second long-duration energy storage procurement, with the selected bid once again a lithium-ion battery energy storage system (BESS).
