

Why is energy in Equatorial Guinea declining?

Energy in Equatorial Guinea is an industry with plenty of potential, especially in the fields of oil and natural gas. However, production has been declining in recent years due to under-investment and lack of new discoveries. In 2022, the country produced less than 100,000 barrels of oil per day (bopd) according to OPEC data.

How much energy does Equatorial Guinea use?

Electricity consumption in Equatorial Guinea in 2015 was 36 kilotonnes of oil equivalent (ktoe). The country produces all of the energy it consumes. As of 2012, renewable energy accounted for 29.2% of the final energy mix.

How much oil does Equatorial Guinea produce a day?

In 2022, the country produced less than 100,000 barrels of oil per day (bopd) according to OPEC data. Electricity consumption in Equatorial Guinea in 2015 was 36 kilotonnes of oil equivalent (ktoe). The country produces all of the energy it consumes.

What are the risk factors affecting Equatorial Guinea's oil and gas industry?

In addition, there are risk factors such as the Russian-Ukraine war, China-U.S. tensions and a global recession which we are closely looking at and wanting to avoid their negative impacts on the global oil market. What are the most important developments for Equatorial Guinea's oil and gas industry in the last 12 months?

Equatorial Guinea gained independence in 1968 after 190 years of Spanish rule; it is one of the smallest countries in Africa consisting of a mainland territory and five inhabited islands. The capital of Malabo is located on the island of Bioko, approximately 25 km from the Cameroonian coastline in the Gulf of Guinea. ...
Energy consumption per ...

Will Equatorial Guinea fulfil its promise as a gas "mega hub," or will stalled negotiations turn what should be a national economic boon into a missed opportunity? The answer depends largely on how quickly the country can nail down gas supply agreements from Nigeria and Cameroon. Right now, things don't seem to be moving nearly fast enough. Will ...

Key assets like Equatorial Guinea's Ceiba field and Gabon's Nyomie Deep 1 are poised to drive output, drawing interest from companies such as Perenco and Capitaïne Energy. As energy security concerns grow, Gabon ...
