

How has Russia impacted Ukraine's energy system?

Ukraine's energy system has been targeted since Russia launched its full-scale invasion of the country in February 2022. These attacks on key infrastructure have recently increased and intensified, posing a huge threat to reliable access to power, heating and communications services across Ukraine this winter.

How can we support Ukraine's energy sector?

We welcome further commitments to provide funding and in-kind support to address the Ukrainian energy sector's most urgent needs, including repairs of damaged power plants and district heating systems, deployment of new, distributed power generation, emergency backup power for critical services, and passive protection for energy infrastructure.

Who owns Ukraine's energy plant?

For months now, she and her colleagues have returned to the plant every day to fix it and help keep the lights and heat on as winter sets in. This plant is owned by DTEK, Ukraine's largest private energy supplier. It says Russia has attacked its facilities nearly 200 times since the Russian invasion in February 2022.

How important is energy security in Ukraine?

These attacks on key infrastructure have recently increased and intensified, posing a huge threat to reliable access to power, heating and communications services across Ukraine this winter. This special report lays out 10 key energy actions to reinforce the country's energy security - essential to its security overall - at this critical juncture.

Did Russia attack Ukraine's energy infrastructure?

Russia has launched a huge attack on Ukraine's energy infrastructure, which authorities said was the 12th large-scale attack on energy facilities this year. Ninety-three missiles and more than 200 drones were used - but 81 of the missiles were shot down, according to Ukrainian President Volodymyr Zelensky.

What is Ukraine's energy security & the coming winter?

This special report from the IEA, Ukraine's Energy Security and the Coming Winter, provides an energy action plan for Ukraine and its partners to help the country meet its energy needs through the challenging months ahead. Ukraine's energy system has been targeted since Russia launched its full-scale invasion of the country in February 2022.
