

How much electricity does the Falkland Islands use?

The Falkland Islands generates 19,000 MWh of electricity as of 2016 (covering 108% of its annual consumption needs). the Falkland Islands consumed 17,670 MWh of electricity in 2016. The Falkland Islands did not import any electricity in 2016. the Falkland Islands didn't export any electricity in 2016.

Does the Falklands need a new wind farm?

But the Falklands feel it is not enough and besides the current wind farm is reaching its renewal date. No wonder then that notice has been given of the planning applications submitted for the Farm Expansion of Sand Bay Wind Farm to include 3 by E70 Enercon wind energy converters and battery storage. FIG and c/o Glenn figure as the applicant.

Where can I find a plan for the Falkland Islands?

FIG and c/o Glenn figure as the applicant. The plans and details can be viewed at the Planning Office, Secretariat, Stanley and on the Falkland Islands Government Planning & Building Services Facebook page. Anyone wishing to comment on these applications must do so in writing, to the Planning Officer, by 2 February 2024.

Solar PV: Solar resource potential has been divided into seven classes, each representing a range of annual PV output per unit of capacity (kWh/kWp/yr). The bar chart shows the proportion of a country's land area in each of these classes and the global distribution of land area across the classes (for comparison).

This has meant that 90% of households in Camp use energy derived from wind and solar power, while 35% of Stanley's energy comes from wind power, mainly three eolic turbines at Sand Bay.
