

Will Fiji be able to source 100 percent of its energy?

Suva, Fiji, October 21, 2020- A landmark agreement between Energy Fiji Limited (EFL) and IFC to deliver the largest solar project of its kind in the Pacific to date has been hailed a transformative step that will take the island nation closer to its goal of sourcing 100 percent of its energy needs from renewable sources.

Is energy Fiji looking for a private sector partner?

Image: UNclimatechange/Flickr State-owned utility Energy Fiji Ltd is ready to start the search for a private sector partner to develop "the largest solar project of its kind in the Pacific to date" after signing a financing agreement with the International Finance Corporation (IFC).

Who supports the Fiji solar project?

IFC has been supported by the governments of Australia and New Zealand through the Fiji Partnership and the Danish Government to carry out this solar project in Fiji.

Why should Fiji invest in solar power?

By harnessing the abundant solar resources of the region, this project aligns with Fiji's national target of achieving 100% renewable electricity and its international commitments to reduce greenhouse gas emissions by 30% by 2030, thus improving living standards, health outcomes, job creation, climate resilience and food security.

How does Fiji generate electricity?

The IFC said Fiji currently generates half its electricity from hydropower plants - identified on the Energy Fiji website as 80 MW and 40 MW facilities on Viti Levu; 45% from fossil fuel imports which contributed around a fifth, or FJ\$1.17 billion (US\$550 million), of the nation's total imports bill last year; and 5% from biomass and wind plants.

Where is Fiji's New solar plant located?

This new solar plant is situated at the Mua Research Centre in the north of Taveuni, an international centre for palm and coconut research owned by the Fijian Government and is poised to bolster the island's existing generation capacity.
