Fisonic????????????,???????????????????? ?????????,???????????? ?????????????????????

it all started with primary energy. Dr Luze was dreaming of a better future when his life changed. He knew that fusion would become his life, and today Fusion Energy Solutions of Hawaii is devoted to the future and survivability of the environment. Our mission is clean, sustainable, primary energy sources for humanity.

Fisonic's unique CHP systems generate electric power as a by-product of providing heat. Our design integrates with a variety of sources, including district-steam, traditional boilers, and ...

Nuremberg, Germany - On June 6, 2024, representatives from renowned German companies in the field of fusion energy met in Nuremberg and founded the industrial association Pro-Fusion.. After many years of fusion research, the commercial use of fusion for energy production is technologically within reach, offering significant advantages for the ...

Fisonic Technology . Fisonic technology harnesses the natural phenomenon of two-phase flow. At the core of the technology is a hyper-efficient heat exchanger that produces thrust. Fisonic devices are heat exchangers, pumps and mixers with patented internal geometry. They mix steam and water by direct contact without consumption of mechanical ...

Fisonic Energy Solutions LLC is an energy service company that utilizes new technology to provide clean and efficient energy solutions across a broad spectrum of industries and applications including, waste heat recovery, commercial heating, and power generation. All of our systems are manufactured in New York and designed to deliver maximum ...

oFisonic system recoversall the energy in the waste condensate and adding just a fraction of the steam required by its controller to meet the building needs. Exhaust Air Energy Recovery o UScleanAir Energy recovery system on fresh air intake/building exhaust ducts. This allows preheating outside air in winter (cooling in summer).

The Fusion Energy Solutions Taskforce: catalyzing breakthrough solutions to accelerate commercial fusion. Learn more Brought to you by the IAEA and the U.S. Fusion Outreach Team this initiative aims to collaboratively explore pathways to engage a wider audience to crowdsource ideas to accelerate the path to commercial fusion energy.

Fisonic commercial heating systems easily replace your existing system and can be installed without disrupting building services. Our systems deliver a wide range of operational, performance and environmental benefits over conventional technology. Reduce Steam Consumption; Reduce Water and Sewer Consumption; District-Steam or Boiler Based Buildings

A Portfolio of Energy Solutions ... We propose the Fisonic Energy Solution that will best meet your needs and custom engineer the system according to the specifics of your facility. See Our Technology: Installation and Testing. We ...

Fisonic's unique CHP systems generate electric power as a by-product of providing heat. Our design integrates with a variety of sources, including district-steam, traditional boilers, and solar thermal systems. Fisonic waste-heat recovery systems generate clean pow-er from an array of sources including; district-steam condensate, steam-traps and
