

Is solar energy a viable option for Myanmar?

While solar energy has its disadvantages - its dependence on sufficient irradiance, large land areas and expensive batteries - it seems like the most promising option for Myanmar.

What is Myanmar's Solar potential?

In the short- to medium-term, off-grid solar home systems and mini-grid solar /solar/hybrid projects aim to connect households in remote locations where the costs of grid access are prohibitively expensive. The Asian Development Bank estimates Myanmar's potential solar resource at 27 GW. To date, very little of this potential has been realised.

Are solar projects a key driver of electrification in Myanmar?

With funding from the World Bank, the Asian Development Bank and other international development finance organisations, off-grid household solar projects and mini-grid solar projects have been a key driver of electrification in Myanmar. To date, they have mostly been utilised for households, villages, schools and hospitals.

Why is solar power important in Myanmar?

Myanmar State Counsellor Aung San Suu Kyi praised solar power for its low maintenance costs, reduced emission levels and contribution to the nation's technological development during the Minbu Solar Power Plant's opening ceremony.

Does Myanmar have any wind power projects generating electricity?

Myanmar does not have any wind power projects generating electricity at present. In March 2016, the Ministry of Electricity and Energy (MOEE) signed a memorandum of understanding for the private construction of a 30 MW wind turbine project subject to the successful conclusion of feasibility studies.

How do I get FNB Connect contract deals?

Get FNB Connect contract deals on UPSs and batteries from as little as R149 per month. Go to [nav&#187;Energy](#) on the FNB App by selecting 'nav-igate life' and then tap on 'nav&#187;Energy', select 'Energy solutions', then go to 'Shop FNB Connect solutions' for deals. When you're ready to install Alternative Energy Solutions, make sure you:

The loan amount you take out on your FNB Personal Loan cannot exceed R300 000. At least 90% of the funds from your Personal Loan must be used for solar generation and related costs. The funds must be used for solar panels and other solar related expenses. Solar related expenses can include batteries, inverters, and installation costs.
