

French Guiana backup generator for off grid solar system

Do you need a backup generator if the sun isn't shining?

While solar panels and inverters can provide clean energy during the day, it's important to have a backup plan for when the sun isn't shining. Installing a backup generator with your existing off-grid solar and inverter setup can ensure uninterrupted electricity and peace of mind, especially during power outages or inclement weather conditions.

Can I use multiple generators for a home backup power solution?

When planning to use multiple generators for your home backup power solution, it is essential to consider the parallel capability of the generators. This feature allows you to connect two or more generators together to increase the overall power output and provide longer runtime.

How do you maintain a backup generator during a power outage?

Regular maintenance and testing of your backup generator is important to ensure it works properly during an outage. Check the generator's oil and fuel levels regularly, and perform routine maintenance tasks like changing the oil and air filter. Test the generator monthly to ensure it's working properly.

How do I choose a backup power inverter?

Look for an inverter that can handle the load of your appliances and has a synchronizing function to match the frequency of the generator with the grid. Selecting a compatible inverter is an important step in ensuring a reliable and efficient backup power solution for your home or business.

Each set solar power system has tested by power-off test of 100 times per hour. Service: Pre-sale: Have been served for 120 countries professional teams will free to help you to design and big project site survey.
