

GCL System Integration |34,402 followers on LinkedIn. Bringing Green Power to Life |GCL System Integration Technology Co. Ltd (GCL S.I.GCLSI) is part of the GOLDEN CONCORD Group(GCL),an international energy conglomerate specializing in clean and sustainable energy.

While the Honor and Evolution series energy storage systems are designed for all-scenario applications with excellent safety assurance and cost efficiency. GCL SI's low-carbon "PV+" industry ecology has saved 2.1 billion kWh of electricity in 2022 in China, while reducing carbon emissions by 1.18 million tons.

At GCL, sustainability is a goal and a driving force behind everything we do. We are committed to leveraging advanced technology to reduce carbon emissions and deliver high-efficiency solar modules and energy storage systems. Our integrated energy solutions help accelerate the transition toward a greener, more resilient future.

The module is fire Class A certified, 100 percent waterproof, level 16 wind resistant with natural heat dissipation feature and more convenient installation and maintenance. GCL's exhibition at Intersolar 2023 also has two featured products, the granular silicon and energy storage system.

Committed to transforming from a “clean energy producer” to a comprehensive “clean energy service provider” and striving towards the goal of becoming a respected global new energy and clean energy company, GCL is leveraging its expertise to support achieving carbon neutrality and creating a green, zero-carbon home for people.

From the financial reports,it is clear that around 70% of GCL System Integration's revenue has come from overseas business over the past few years,indicating a quite successful internationalization of the company. However,this year,due to the ongoing pandemic,I think the domestic market will increase.
