

How many battery energy storage sites will Georgia Power have in 2026?

Georgia Power has applied for certification of four battery energy storage sites totaling 500 MW expected to come online in 2026.

When will Georgia's battery storage system come online?

The battery system is expected to come online as early as 2026 and is subject to regulatory approvals. "As we continue to build Georgia's clean energy future, battery storage systems play a vital role in how we will continue to serve our customers with clean, reliable energy for decades to come.

Why do Georgians need battery storage systems?

Battery storage systems part of plan to add renewable energy and help ensure reliability for Georgians

Which Georgia Power Bess projects are underway?

Other Georgia Power BESS projects underway include a 65 MW project in Talbot County (Mossy Branch) and a 13 MW project with the US Army at Fort Stewart near Savannah. Form Energy is an American technology company developing and commercializing a new class of cost-effective, multi-day energy storage systems.

Will Georgia Power be able to build Bess?

In April, Georgia Power received permission from the Public Service Commission to forgo the typical bidding process and get right to constructing BESS to support its needs. In that filing, Georgia Power signaled its intention to solicit bids for more storage- another 500 MW- in the near future.
