SOLAR PRO. Germany ecostruxure energy hub

Achieve your business and sustainability goals with energy management software uniquely designed for buildings. Simply connect your energy systems and gain insights to conserve energy, reduce costs, and increase resilience.

Analyze energy usage and reduce waste: Gain energy awareness, baseline energy usage, identify areas to focus, set targets and take action. Track usage by load type (HVAC, lighting, and plug loads) and with that aggregate energy by site, building, floor, area, and zones which will result in energy usage reports by the format of monthly, daily ...

Der EcoStruxure Energy Hub lässt sich schnell einrichten. Die Energiedaten werden von den drahtlosen PowerTag erfasst und unkompliziert über den EcoStruxure Panel Server direkt und ohne zusätzliche Software in die Cloud-Lösung eingebunden.

EcoStruxure(TM) Energy Hub features simple-to-use, cloud-based software to address the energy challenges faced by commercial and industrial building professionals. The software-as-a-service solution simplifies building management by providing a complete view of building energy use with minimal upfront costs and IT maintenance.

To help solve this problem, EcoStruxure Energy Hub is a simple, smart, and scalable energy-monitoring solution for electrical contractors in the mid-tier market. In this 60 ...

To help solve this problem, EcoStruxure Energy Hub is a simple, smart, and scalable energy-monitoring solution for electrical contractors in the mid-tier market. In this 60-minute webinar, learn how EcoStruxure Energy Hub can make life easier by:

EcoStruxure Energy Hub is a purpose-built building energy management system designed to simply and effectively raise energy awareness and drive energy performance in buildings. Simply connect your energy infrastructure and subscribe to the application to start your journey to achieve your energy and sustainability results, while maximizing the ...

Designed for mid-market Commercial and Industrial buildings, Energy Hub is a scalable, "self-service" IoT software as a service (SaaS) solution which simplifies the management of digitalized electrical and energy systems.
