DNV GL's report "Transition Faster Together: Renewable solutions, strategies and policies for a clean energy future", outlines focus areas where concentrated efforts can enable the large-scale uptake of renewable energy, helping to limit the global temperature rise to 1.5°C and meet the goals of the Paris Agreement. These focus areas include:

TUVALU'S NEW ENERGY GOAL The Pacific Island state of Tuvalu carries the pre-carious risk of being one of the first countries to be submerged by sea level rise due to global warming. This has spurred policy makers to set a long-term goal to generate 100 percent of its electricity from renew-able sources, breaking a dependence on expensive,

The recent signals in the energy sector indicate a major transformation taking shape in the energy sector in the decades to come. The potential trends are highlighted in three scenarios published by the World Energy Council in September 2019 and further presented in detail and in a long-term perspective in this article. Compared to developments of the past, the ...

We expect higher inflation to weigh on households' purchasing power and corporate profits in the coming months. Although high frequency data coming out of the country is limited, recently released data from the Tuvalu Central Statistics Division showed that consumer price inflation accelerated from 7.5% y-o-y in Q321 to 9.8% in Q421 (see chart below).

Holistic approaches like WEF's Net Zero Carbon Cities" systemic efficiency aim to enable a decarbonized, highly electrified and resilient city ecosystem through ultra-efficient buildings and smart energy infrastructure. With this framework, cities have an opportunity to boost their resilience to a range of future climate and health-related crises, as well as create jobs ...
