

What is Green Lantern solar?

"Green Lantern Solar will continue to develop a variety of project types and sizes across multiple geographic regions to ensure a steady stream of shovel ready projects so homes, businesses and schools can rely on clean and affordable energy to offset their fossil fuel consumption," Green Lantern Vice President of Development Geoff Sparrow said.

What will Green Lantern Solar do in 2023?

January 24, 2023 - WATERBURY, VT - With an eye on the future, Green Lantern Solar, a leading renewable energy development and finance company focusing on commercial solar and energy storage systems, is parlaying its 2022 accomplishments to catalyze significant growth in 2023.

How does Green Lantern save money?

Green Lantern saves its off-takers over a million dollars a year in electricity expenses. The company is seeing an uptick in farmers and owners of brownfields, landfills and other sites leasing their property for array development to add another stream of revenue. In many cases, solar arrays have improved the health of properties.

Is Green Lantern solar a viable alternative to fossil fuels?

Solar is already competitive economically with fossil fuels, and we have to sustain that growth to provide the United States with clean and reliable energy." Green Lantern Solar plans to expand its footprint beyond Vermont and the Northeast and develop projects in other states across the U.S.

What does Green Lantern do?

Green Lantern works with landowners to revitalize and re-develop low-value sites such as brownfields, landfills, quarries/pits/extraction sites and other challenging real estate. The company provides a full suite of services: development, financing, construction and operations, maintenance and asset management.

Why should you choose Green Lantern solar?

At Green Lantern Solar, we help communities preserve their land while generating sustainable energy locally. We ensure our solar installations are set back from roads, minimize construction waste and help farmers generate additional revenue to keep their farms in operation.
