

What type of energy is used in Grenada?

Renewable energy here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal energy. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important energy source in lower-income settings. Grenada: How much of the country's energy comes from nuclear power?

Who is responsible for energy projects in Grenada?

The MOID (Ministry of Infrastructure Development, Public Utilities, Energy, Transport, and Implementation) is responsible for energy programs in Grenada. MOID handles the majority of permitting related to energy projects.

How much does electricity cost in Grenada?

The 2015 electricity rates in Grenada are \$0.34 per kilowatt-hour (kWh), in line with the Caribbean regional average of \$0.33/kWh. Like many island nations, Grenada is almost 100% reliant on imported fossil fuels for electricity generation, leaving it vulnerable to global oil price fluctuations that directly impact the cost of electricity.

Who owns the electricity in Grenada?

Utility investors: 50% with U.S.-based WRB Enterprises; the public holds 25%; and the government, its employees, and the National Insurance Scheme Grenada hold the remaining 25%. Nearly 99% of electricity is sourced from diesel fuel. The utility maintains an installed capacity of 48.6 MW spread across the three islands.

Does Grenada have a wind farm?

Grenada has had success with implementing energy efficiency and renewable energy projects. To date, GRENLEC has assessed five sites on the main island and two on Carriacou for wind farm feasibility. A wind-diesel hybrid has been discussed for Petite Martinique, but its development is on hold.

How does MOID work in Grenada?

MOID handles the majority of permitting related to energy projects. Electricity self generators must apply for a permit through the PURC (Public Utilities Regulatory Commission), Grenada's regulatory authority for energy.

In 2020, Grenada produced 223 GWh of electricity, relying mainly on fossil fuels (98.12%), with a small contribution from solar energy (1.88%). Demand. In 2018, peak demand was 33.2 MW. Consumption. In 2016, Grenada consumed 185.1 million kWh of electricity. As of 2018, 95.3% of the population had access to electricity. Coal in Grenada

This document presents Grenada's Energy Report Card (ERC) for 2021. The ERC provides an overview of the energy sector performance in Grenada. The ERC also . includes energy efficiency, technical assistance, workforce, training and capacity building . information, subject to the availability of data.
