

Does Guernsey have electricity?

Over 93% of electricity in Guernsey is renewable. Our island's imported electricity is sourced from 100% renewable energy, including solar, wind and hydroelectricity. This is brought into the island through a subsea cable and distributed to every home and business using an underground network of cables.

Who is Guernsey energy?

From tailored payment plans and energy efficiency advice to priority callouts and safety checks, we're here to make things easier for you if we can. © 2024 Guernsey Energy, a trading name of Guernsey Gas Ltd, a member of the Islands Energy Group. We've been providing energy solutions to the Channel Islands for almost 200 years.

Does Guernsey Electricity charge a monthly charge?

Where Guernsey Electricity is required to provide a standby electricity service for 'behind the meter' non-renewable energy installations (including CHP) with generation capacity in excess of 25kW, a monthly charge will be applied. For every kW of installed capacity, we charge the standby rate.

What is the maximum resale price for electricity in Guernsey?

Guernsey Electricity Limited, in accordance with section 23 (2) (b) of the Electricity (Guernsey) Law 2001, hereby gives notice that the maximum resale price at which electricity can be resold by persons to whom it is supplied is *25 pence per unit. What Is A Tariff? Put simply, a tariff calculates your bill.

Does Guernsey have on-island solar?

Alan Bates, CEO of Guernsey Electricity Community solar. Guernsey has already started on-island renewable generation with community-scale solar arrays feeding over 350kW of renewable solar power into the grid. This means that no matter your property size, a portion of your electricity will always come from on-island solar energy.

Does Guernsey energy offer free priority care?

We offer free Priority Care for customers who need extra support. From tailored payment plans and energy efficiency advice to priority callouts and safety checks, we're here to make things easier for you if we can. © 2024 Guernsey Energy, a trading name of Guernsey Gas Ltd, a member of the Islands Energy Group.

A key technology in managing this gap between generation and demand are Battery Energy Storage Sites (BESS). These can charge from the grid when there's an abundance of renewable electricity during peak generation periods and then discharge back onto the grid when there's a shortfall in supply.

However the long-term benefits include owning a low-carbon heating system that is cheaper to run, plus an opportunity to future-proof your property through investment in a "dry" heating system (i.e. with no complex

plumbing) that ...

The latest price increase implemented by Guernsey Electricity shows the increasing benefit of investment in self-generation and energy storage technology, according to the green energy experts at The Little Green Energy Company.

Storage heating uses clever systems that maximise off-peak (low-rate) electricity to heat up specialised storage bricks within the heaters. These clay or ceramic bricks act like a reservoir, absorbing your cheaper overnight electricity, then storing it ...
