

How will ExxonMobil's Liza project benefit Guyana?

The gas to energy project includes a pipeline that will bring associated gas from offshore ExxonMobil's Guyana operated Liza Phase 1 and Phase 2 projects to onshore gas-processing facilities. The project will allow for a lower cost, cleaner and more reliable energy source for Guyana," a sign at the entrance states.

Does ExxonMobil have a natural gas project in Guyana?

The project will utilize natural gas from the Stabroek Block's Liza Phase 1 and 2 Projects. During the company's first-quarter 2024 earnings presentation, ExxonMobil Chairman and CEO Darren Woods highlighted the benefits of this project, describing it as a "win-win proposition," particularly for the people of Guyana.

Why does Guyana need a dependable source of energy?

The government hopes the effort will bring a dependable source of energy to diversify the economy. At the same time, rising sea levels threaten the capital, Georgetown. Countries like Guyana are caught in a perfect storm where the consequences for extracting fossil fuels collide with the incentives to do so.

Are oil companies compromising environmental governance in Guyana?

Last month, Ms. Deane-Hughes joined other activists, virtually, at a hearing before the Inter-American Commission on Human Rights, making the argument that oil companies have compromised environmental governance in Guyana.

How will a natural gas pipeline work in Guyana?

The project will deliver natural gas liquids (NGL) and dry gas to the Government of Guyana. A subsea pipeline is expected to be installed on the seafloor to transport natural gas from the Liza field to an onshore pipeline on the West Coast of the Demerara River. Onshore, a pipeline will deliver the gas to the integrated facility at Wales.

How much will the cost of electricity be reduced in Guyana?

It is expected that the cost of electricity for consumers will be reduced by some 50 per cent. Currently, the power utility, Guyana Power and Light (GPL), provides electricity at a rate of 15 US cents per kilowatt hour.

(Georgetown) February 05, 2024 - The Guyana Energy Agency (GEA) has recorded notable milestones from energy projects undertaken in 2023 as Guyana pursues important steps to decouple economic growth from using fossil fuels for electricity generation and harness its low-carbon resources. GEA's energy progress has helped to address rising ...

More than 90% of Guyana's total energy supply comes from fossil fuels, with the remainder derived from renewables such as wood and sugar cane residue. Fossil fuels accounted for more than 85% of installed

capacity and nearly 97% of electrical generation in 2020, complemented by small contributions from biofuels, wind, and solar energy. Guyana's officially stated goal is to ...
