

Who is H2Go power?

H2GO Power |9,340 followers on LinkedIn. Developing and delivering hydrogen energy storage for zero-emission, reliable and safe power supply |H2GO Power is a pioneering cleantech company. We develop and deliver hydrogen energy storage technology for zero-emission, safe and reliable power supply, with a range of commercial applications.

Can H2Go power be used for long-term energy storage?

H2GO Power also envisions it could be suitable for long-duration energy storage for power and grid stability applications as those markets develop in the medium-term. Other consortium partners include the European Marine Energy Centre LTD (EMEC), ARC, Autodesk, HSSMI, and Manufacturing Technology Centre (MTC).

How can H2Go power help a commercial hydrogen project?

"This demonstration showcases our ability to deploy proprietary hardware and software solutions into a commercial hydrogen project," Luke Sperrin, CTO and co-founder of H2GO Power. "Using intelligent optimisation software, we quicken the communication during the production process and ultimately deliver hydrogen faster and more efficiently.

What is H2Go power bringing to Scotland's Orkney Islands?

LONDON, UK (May 19, 2022) -- As Europe continues to lower its dependence on fossil fuels with renewable energy, H2GO Power is deploying its state-of-the-art commercial-scale hydrogen storage technology to bring greater energy security and reliability to the electrical grid of Scotland's Orkney Islands.

Does H2Go power have AI & hydrogen storage?

Earlier this year, H2GO Power announced a separate deployment of its AI and hydrogen storage technology, funded by the Sustainable Innovation Fund, with EMEC and Imperial College London.

What is H2Go power's HyAI platform?

H2GO Power will be using its AI platform, HyAI to provide optimisation of the interdependent variables required for a potential green hydrogen production facility, such as offshore windfarm sizing, electrolysis capacity, transport and storage capacity, water availability and offtake optionality.

As H2GO Power is present at #COP28, what is better than the announcement of contract awards by Equinor and SSE plc to advance the work on one of the largest green hydrogen projects in the world, Dogger Bank D. Dogger Bank D, a joint venture between Equinor and SSE. It is being advanced with both power and green hydrogen as potential end products. The 2 GW offshore ...

This has the potential to increase power reliability, allow for higher penetrations of renewable energy, accelerate the shift to a net-zero emission economy. Building on this project, the next steps are to facilitate a

commercial demonstration of H2GO Power's AI software platform and power to power hydrogen storage technology.

A consortium led by H2GO Power has secured £4.3 million from the U.K. Government to roll-out a smart hydrogen storage system in the Orkney Islands. ... Other consortium partners include the ...

Lead Organisation: H2GO Power Ltd BEIS funding: £3,118,627.48. Hydrogen could play a valuable role in enabling net-zero targets, through integration in energy systems, industry and transportation ...

H2GO Power is deploying a state-of-the-art commercial-scale smart hydrogen storage technology to bring greater energy security and reliability to the electrical grid of Scotland's Orkn...

The project is run by a consortium under H2GO Power's lead and that includes a number of partners such as ARC, HSSMI, The European Marine Energy Centre LTD (EMEC), Autodesk, and Manufacturing Technology Centre (MTC). The UK has been making important steps to adopt H2, including advancement of green hydrogen storage.

Equity Crowdfunding - H2GO Power . 1: obfuscated. obfuscated -- Investors. Edit Investors Section. Number of Lead Investors 2. Number of Investors 3. H2GO Power is funded by 3 investors. Department for Energy Security & Net Zero and UK Government are the most recent investors. Which investors participated in the most funding rounds?

LONDON, UK (May 19, 2022) -- As Europe continues to lower its dependence on fossil fuels with renewable energy, H2GO Power is deploying its state-of-the-art commercial-scale hydrogen storage ...

H2GO Power is an award winning spin-out company from the University of Cambridge developing safe and low-cost hydrogen production and storage technologies. Their mission is to bring affordable reliable energy to millions across the globe in a green way for large social and environmental impact.

H2GO Power also envisions technology suitability for long-duration energy storage for power and grid stability applications as those markets develop in the medium-term. The project expects to generate 100 additional jobs by 2026 through H2GO Power and 50 more jobs across the other partners.

Innovation on the energy storage front; Plug and Play stationary power units, shipping container size units that combine H2 generation, storage and conversion designed to store energy in the form of H2 (i.e. "H2 batteries")

H2GO Power Limited - August 28 H2GO Power Limited, a London-based cleantech company that delivers hydrogen energy from renewable sources, fell into administration in August, with David Taylor and Paul Ellison of KRE Corporate Recovery appointed as joint administrators. In the company's accounts for the year ending April 30 2023, its ...

Dr. Enass Abo-Hamed MBE is the Co-founder and CEO at H2GO power ltd; an award winning spin-out company from the University of Cambridge developing energy storage technologies. She completed her PhD at Cambridge University, where she also was a postdoctoral fellow and elected Cambridge University Energy Champion. Currently she is also a member of the ...

H2GO Power. Zero-Emission & Reliable Power for Hospitals in Sub-Saharan Africa (hZERPH) REGION. Nigeria, Western Africa. Technology. Hydrogen and fuel cells. SECTOR. Energy generation. SCALE. Mini-Grid. STAGE. Early. ROUND. Round 7. Post navigation. Water Powered Technologies Africa Power .

A project, led by UK-based H2Go Power, will deploy and trial a modular 1-MWh solid-state hydrogen storage system in Scotland's Orkney Islands, which is intended as a more efficient alternative to high-pressure storage. A project, led by UK-based H2Go Power, will deploy and trial a modular 1-MWh solid-state hydrogen storage system in Scotland's ...

H2GO POWER LTD is a Private Limited Company and was incorporated on Jul 20, 2014 in United Kingdom. Its corporate identification number is (CIN) 9139481 and its current status is Active. Entity Details. CIN 9139481. Current Legal Name H2GO POWER LTD. Previous Legal Names-Current Status Active.
