

Why did Zola electric join Haiti green solutions?

Energy technology company ZOLA Electric announced the partnership with local renewable energy pioneer Haiti Green Solutions for the deployment of its flagship energy technology platform to help address the energy crisis in the country, where the vast majority of its 12-million population lack access to reliable and affordable energy.

How can Haiti improve energy resilience?

In the face of these obstacles, Haiti is forging a path toward energy resilience with support from USAID and the National Renewable Energy Laboratory (NREL). Central to this effort is the development of energy modeling frameworks and trainings, microgrids, agrivoltaics, and off-grid solar power to enhance energy resilience and security in Haiti.

Is Haiti a good place to install solar power?

The domestic market in Haiti for reliable clean energy systems is largely untapped, with electricity demand expected to increase by 50% by 2030. The island's tropical climate makes it an ideal location for solar deployment.

Energy technology company ZOLA Electric announced the partnership with local renewable energy pioneer Haiti Green Solutions for the deployment of its flagship energy technology platform to help address the energy crisis in the country, where the vast majority of its 12-million population lack access to reliable and affordable energy.

HGS is the exclusive distributor of ZOLA FLEX in Haiti! ZOLA FLEX is a plug-and-play, connected, solar and storage hybrid power system. Leveraging optimized design and ultra-efficient appliances, ZOLA FLEX can power the essentials ...

At Haiti Green Solutions, we harness the power of nature's green energy to provide affordable and environmentally friendly solutions that empower communities, stimulate economic growth and safeguard the planet.

Through research and stakeholder engagement, USAID and NREL published a framework to adapt agrivoltaic solutions for minigrid contexts in Haiti. These solutions aim to boost energy production, thereby addressing energy poverty, and increase agricultural yields, thereby addressing food insecurity.
