

What is a solar energy project in Serbia?

The project is designed to lead to energy savings, increased comfort, and warmer homes for residents through investments in clean and efficient heating solutions and rooftop solar photovoltaic systems, in a shift away from air-polluting fossil fuels that dominate Serbia's energy mix.

What is Fortis Energy doing in Serbia?

In Serbia, Fortis Energy is actively working on several high-profile projects, including the development of total capacity with 509 MW wind farms, as well as solar power projects with total capacity of 387 MWp. These projects underscore Fortis Energy's dedication to expanding Serbia's renewable energy capacity and reducing its carbon footprint.

How much hydropower does Serbia have?

Serbia has plans to significantly expand its installed hydropower and renewables capacity in the coming years. It currently has a total capacity of approximately 3490 megawatts (MW) of renewables, with 2342 MW in hydropower in 2019 according to the European Energy Community.

How much electricity does Serbia get from fossil fuels?

Serbia currently gets more than 60% of its electricity from fossil fuels. The contract is the latest in a line of solar projects backed by Serbia's Ministry of Mining and Energy this year, which includes plans for a 1 GW solar panel factory and another 500 MW of solar.

How much power does Serbia have?

It currently has a total capacity of approximately 3490 megawatts (MW) of renewables, with 2342 MW in hydropower in 2019 according to the European Energy Community. Serbia announced plans to install new hydropower plants and two existing dams, and to rehabilitate a further 15 existing power plants totaling around 30 MW with EBRD financing.

Is solar a good option for Serbia?

A statement published on the Serbian government's website says solar is the most optimal solution to quickly reach large capacities from green sources, without burdening and endangering the stability of the transmission network. Serbia currently gets more than 60% of its electricity from fossil fuels.

RES Serbia and New Energy Solutions hosted high school girls from Tutin. deca-en / Danijela The Green Women's Network RES Serbia and the New Energy Solutions company hosted the best high school students from Tutin to provide them with information about renewable energy sources and career opportunities. Special interest was aroused by the ...
